(1) route?

The diagram illustrates the relationship between three design patterns:

- Facade** is connected to **Adapter** via a double-headed arrow.
- Facade** is connected to **Composite** via a single-headed arrow pointing towards **Composite**.
- Adapter** is connected to **Composite** via a single-headed arrow pointing towards **Composite**.

۳

A hand-drawn diagram illustrating a process flow. At the top right, the word "low" is written above a horizontal line. To the left of this line, the word "hash" is written in a large, cursive script. A curved arrow points from "hash" down towards the word "rehash", which is written below it in a similar cursive script. A horizontal line extends from the bottom left under the "hash" and "rehash" words, ending with a small arrowhead pointing towards the "rehash" word.
